Research Papers

Investigation of the SOS response of *Escherichia coli* after γ-irradiation by means of the SOS chromotest
S. Kozubek, M.M. Ogievetskaya, E.A. Krasavin, V. Drasil and J. Soska (U.S.S.R., Czechoslovakia) 1

Structural basis of the genotoxicity of nitrosatable phenols and derivatives present in smoked food products
H.S. Rosenkranz, G. Klopman, H. Ohshima and H. Bartsch (U.S.A., France) 9

SCE induction and cell-cycle delay by toxaphene
H.H. Steinel, A. Arlauskas and R.S.U. Baker (Australia) 29

Induction of ouabain-resistance mutation and cycle-dependent transformation of C3H/10T1/2 cells by *N*-nitroso-2-acetylaminofluorene
J.-K. Lin and M.-L. Kuo (China) 35

Frequency of micronucleated cells in the mouse bone marrow after exposure to various doses of γ-radiation
G.C. Jagetia (India) 45

Dietary fat modifies the in vivo mutagenicity of some food-borne carcinogens
W.E. Brennan-Craddock, T.M. Coutts, I.R. Rowland and A.J. Alldrick (Great Britain) 49

The effect of plasmid pKM101 on *umuDC* gene function enhancing precise excision of transposons
I.V. Andreeva, O.Y. Rusina, E.E. Mirskaya and A.G. Skavronskaya (U.S.S.R.) 55

Induction of specific-locus and dominant lethal mutations in male mice in the low dose range by methyl methanesulfonate (MMS)
U.H. Ehling and A. Neuhäuser-Klaus (F.R.G.) 61

Comparative induction of gene mutations and chromosome damage by 1-methoxy-1,3,5-cycloheptatriene (MCHT), 1. Results from a battery of standard tests
J.C. Asquith, J. Dewey, C.G. Lee, B.C. Morris and T.D. Webber (Great Britain) 71

Comparative induction of gene mutations and chromosome damage by 1-methoxy-1,3,5-cycloheptatriene (MCHT), 2. Results using L5178Y mouse lymphoma cells to detect both gene and chromosome damage; validation with ionizing radiation, methyl methanesulphonate, ethyl methanesulphonate and benzo[*a*]pyrene
J. Cole, M.-C. Diot, F.N. Richmond and B.A. Bridges (Great Britain) 81

Comparison of baseline sister-chromatid exchanges (SCE), cyclophosphamide-, ethylnitrosourea (ENU)-induced SCE, ENU-induced cell-cycle delay and chromosome aberrations between Peru and laboratory mice
C.C. Huang, J.C. Tan, S.R. Sirianni, P.D. Pacholec and V.M. Chapman (U.S.A.) 93

A quantitative assay for measuring the induction of mutations in human peripheral blood T-lymphocytes
T. Norimura, V.M. Maher, J. Justin McCormick (U.S.A.) 101

A comparative study on the metabolic activation of 3,4-benzo[*a*]pyrene to mutagens by aorta smooth muscle cells of rat and rabbit
R.M.L. Zwijsen, E.M. Van Kleef and G.M. Alink (The Netherlands) 111

Announcement 119

Research Papers

Antimutagens from *Momordica charantia*
A.P. Guevara, C. Lim-Sylianco, F. Dayrit and P. Finch (Philippines, U.K.) 121

Effects of vanillin and *o*-vanillin on induction of DNA-repair networks: modulation of mutagenesis in *Escherichia coli*
K. Takahashi, M. Sekiguchi and Y. Kawazoe (Japan) 127

I-R hybrid dysgenesis in *Drosophila melanogaster*: nature and site specificity of induced recessive lethals
C. Prudhommeau and J. Proust (France) 135

Molecular changes in UV-induced and γ-ray-induced mutations in human lymphoblastoid cells
A. Tachibana, T. Ohbayashi, H. Takebe and K. Tatsumi (Japan) 159

A unique human mutant B-lymphoblastoid cell line (ataxia telangiectasia) which exhibits increased sister-chromatid exchange retaining hypersensitivity to neocarzinostatin and bleomycin
M.-J. Li and Y. Shiraishi (Japan) 167

Bromodeoxyuridine (BrdU) template and thymidine pool effects on high frequencies of sister-chromatid exchange (SCE) in Bloom syndrome cells and a mutant cell line (AsHa) originated from ataxia telangiectasia
Y. Shiraishi and M.-J. Li (Japan) 177

0027-5107/90/$03.50 © 1990 Elsevier Science Publishers B.V. (Biomedical Division)

Frequency of spontaneous and induced recessive mutations in a diploid strain of *Aspergillus nidulans*
N. Babudri and G. Morpurgo (Italy) 187
Increased frequency of chromatid breaks in lymphocytes of heterozygotes of ataxia telangiectasia after in vitro treatment with caffeine
A.L. Pawlak, M. Kotecki and R. Ignatowicz (Poland) 197
Female-specific dominant lethal effects in mice
M.A. Katoh, K.T. Cain, L.A. Hughes, L.B. Foxworth, J.B. Bishop and W.M. Generoso (U.S.A.) 205
Inhibition of repair of O^6-methyldeoxyguanosine and enhanced mutagenesis in rat-liver epithelial cells
N.K. Alvi, P.G. Foiles and G.M. Williams (U.S.A.) 219
Chromosomal aberrations in V79 hamster cells induced by hyperosmotic solutions of NaCl
C. Nowak (Germany) 227
Hypoxanthine enhances hydroxyurea-induced sister-chromatid exchanges in Chinese hamster ovary cells
H. Tohda and A. Oikawa (Japan) 235
Genetic control of the UV-induced SOS mutator effect in single- and double-stranded DNA phages
G. Maenhaut-Michel and P. Caillet-Fauquet (Belgium) 241
The use of multiple sampling times in in vitro chromosome assays
C. Nowak (Germany) 255
Effects of monosaccharides and disaccharides on the formation of food mutagens in model systems
K. Skog and M. Jägerstad (Sweden) 263
Chromosomal instability and cellular hypersensitivity to X-radiation of cultured fibroblasts derived from porokeratosis patients' skin
R. Watanabe, Y. Ishibashi and F. Otsuka (Japan) 273
